

Scribe v3.11 Release Notes

- I Installation Notes**
- II What's New - Overview**
- III Contact Information**

I. Installation Notes

The Scribe Setup program installs Scribe, related components and documentation.

Upgrading From Scribe v3.10 and earlier versions

The setup program will upgrade earlier versions of Scribe including Scribe v3.10 and earlier to the current version.

To install Scribe:

1. Run the Scribe Setup
2. Follow the on screen instructions.
3. When the installation is complete, a Scribe program group icon will be installed.
4. To run the program, click on the Scribe icon or go to Start, Program Files, Scribe menu.

Please visit the Scribe development website at <https://response.epa.gov/scribe> for updates.

II. What's New - Highlights

- Scribe.NET upgrade to .NET Framework 4.7.2 to support later versions of Transport Layer Security (TLS).
- Removed dependency for .NET 3.5/2.0
- Scribe Maintenance Items and Enhancements
- Revised documentation, EDD Files and sample projects.
